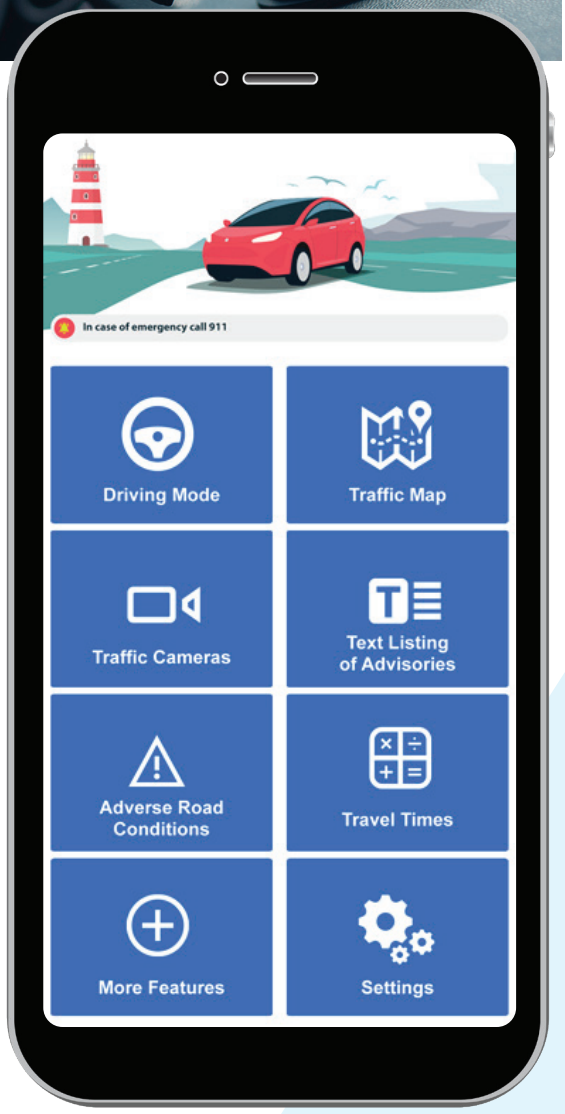
Geotalker™

Geotalker™

The mobile app that puts safety first.

Imagine having an app that broadcasts information your drivers need to hear, when they need to hear it. There is no need to look at the app or touch the app to get important roadway advisories.

Integrate citizen reporting functionality, fast track alerts for quick delivery, trip planning features, including turn-by-turn directions and all the features available on your adaptive website.



- **Location Specific**
  Drivers hear your message at the right place.
- **Time Specific**
  Drivers hear your message at the right time.
- **Type Specific**
  Drivers hear messages that are the right type of information for their trip.
