

Get live video streams
from remote cell phones into your Ops center.

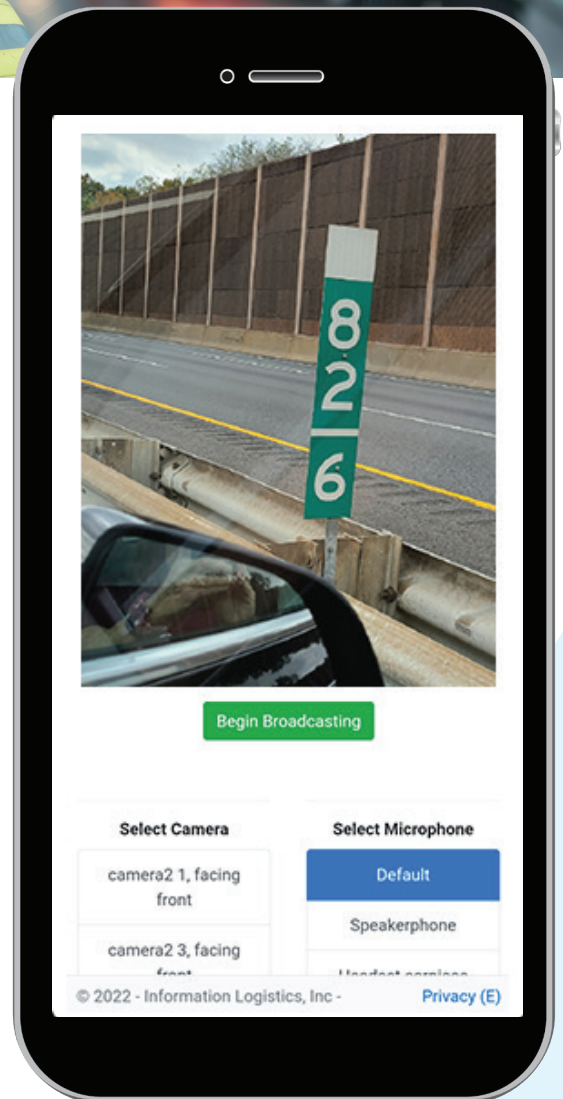

IRIS Eyes™

Remote cameras, everywhere, on demand.

A report of a sink hole on a major road was just reported. There are no nearby traffic cameras. But there is an agency maintenance worker nearby.

The trapped queue is in an area with no traffic cameras. A traveler has informed you they are at a location that you and your supervisor need to see right now.

- Get live video streams from remote cellphones into your operation center.
- Your staff can share the viewing link so that several people can view the live stream simultaneously.
- Rewind the video to view earlier parts of the stream.
- Download the video afterward for after action review.
