

When a car breaks down, and assistance is needed.

When someone is lost and needs your help.

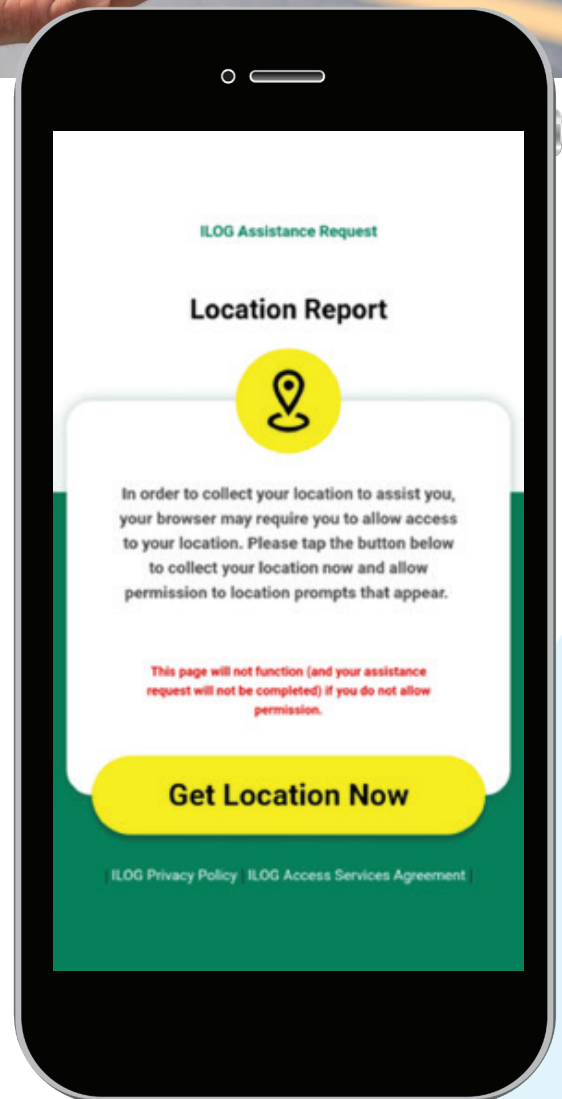

When it is too dark for a driver to see mile markers, but needs help.

IRIS Locate™

Text message system to locate travelers in distress.

- Finding the driver in trouble is one simple text message away. No app needed.
- Allows you to request a location point from the lost traveler. They click a link, and their phone's GPS location is plotted as a map point on your operator's console.
- Save responder time by verifying the disabled vehicle location.
- Send Google and Apple Maps directions link to responders.
- Integrated with HAAS Alert
 - Automatically sends traveler warnings to Waze, Apple Maps and Stellantis on board nav systems.
